**SECOND, NON-FINAL DETAILED ACTION**

***Claim Objections***

1. Claim 12 is objected to because of the following informalities: In line 2 of Claim 12 it is not clear whether the word is "homogenously" or homogeneously". Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 8-12 rejected under 35 U.S.C. 102(b) as being anticipated by US Patent Number 5,626,692 to Rohatgi et al.

With regard to Claims 8-12, Rohatgi teaches a composite material which consists of a metal bulk material in which another material is homogenously dispersed in the bulk material in a particulate form. The bulk or base material is aluminum while the dispersion material is carbon (Col. 2, Ln. 51-61).

It is the examiner's position that the composite material of Rohatgi is identical to or only slightly different than the composite material prepared by the method of the claims, because both composite materials are composed of either a metal or nonmetal as a base material with a dispersion of a metal or nonmetal as a dispersion material. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the

Art Unit: 1775

product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985). The burden has been shifted to the applicant to show obvious difference between the claimed product and the prior art product. *In re Marosi*, 218 USPQ 289 (Fed. Cir. 1983). Rohatgi anticipates the claimed subject matter. It is noted that if the applicant intends to rely on Examples in the specification or in a submitted declaration to show non-obviousness, the applicant should clearly state how the Examples of the present invention are commensurate in scope with the claims and how the Comparative Examples are commensurate in scope with the Rohatgi et al.

*Response to Arguments*

4. Applicant's arguments with respect to claims 8-9 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*
